

DEFENCEPORT

ALWAYS LEADS, NEVER FOLLOWS

PRODUCT CATALOG
INTERNATIONAL ARMS MANUFACTURER

**COMING
SOON...**

The exact name of our company is Defenceport Molding and Injection, Defence Industry, Import and Export, Limited Company. Our company continues production for over thirty years with a custom that is passed from father to son. We define ourselves as the address of innovation and quality.

R&D and quality innovations are the priority of our firm. Connected to that we have a strong team for designing, artshop, metal, and plastic injection units. All the plastic injection work is done inside the house. Also, we have a facility and a team for machining. We have a barrel workshop, deep-hole drilling machines, CNC machines that are qualified enough to process revolver parts, and a great team that oversees all these affairs. Other than that we have a pressing workshop for producing metal magazines and a specialized team for the job. We have business partnerships for production and sales in the Defence Industry. When we evaluate these qualities altogether, it is apparent that we are a company which always presents impressive, different, quality jobs. We became one of the few companies that produce 20-round drum magazines just like we became the company that produced the best working and designed 1919 style 12 gauge 20-round drum magazine. After that, we managed to produce the first 1919-style 30-round drum magazine and we are working on a saiga drum project that can take 3" shells. All the products we have and produce in our catalog have unique features and qualities. Our fundamental focuses are endurance, design and innovation.

As a team, we are after projects and project partnerships for the World's most solid, different, and popular products. We surely moving forward in the direction of being the company that sets standards and leads the way.

AMBIDEXTROUS SAFETY SWITCH

BOLT BUFFER TECHNOLOGY

TANK12 / D-B12M

D-B12M

They say bullpup designs are the future of the weapons industry, and exactly for that reason, we are here with the DEFENCEPORT Tank12 that will lead the future. With this 12 gauge shotgun, we are offering you a more convenient and enjoyable experience. With new longer front and rear sights aiming from the shoulder is now more comfortable and convenient. Tank12 took advantage of the R&D resources of Defenceport and equipped them with useful features. We followed the principle of durability and added the barrel nut lock, and bolt buffer and increase the lifetime of your bullpup. We added an ambidextrous magazine release button to increase the shooter's speed. Defenceport thought about our left-handed shooters and added an ambidextrous charging handle to the mix. Last but not least we put an ambidextrous safety switch to enrich your experience. DEFENCEPORT Tank12 is compatible with our signature 20 and 30-round DRM-12 Drum Magazines.

HANDGUARD MATERIAL OPTIONS	T6-7075 HARDENED ALUMINIUM				

TANK12S / D-B12M

We added Tank12S to our family for Defenceport users as a price-performance bullpup. While consisting all of the features of a Tank12, it is lighter and affordable because of its polymer handguard. With DEFENCEPORT Tank12S, we lighten the load of a compact design and made it more tactical and fit for home defense. Because of this, you can cover the corners of your house faster and more easily. The magazine port of Tank12S is proper for the use of our 20 and 30-round DRM-12 Drum Magazine.

* Longer front and rear sights
