# ABOUT US

The exact name of our company is Defenceport Molding and Injection, Defence Industry, Import and Export, Limited Company. Our company continues production for over thirty years with a custom that is passed from father to son. We define ourselves as the address of innovation and quality.

R&D and quality innovations are the priority of our firm. Connected to that we have a strong team for designing, artshop, metal, and plastic injection units. All the plastic injection work is done inside the house. Also, we have a facility and a team for machining. We have a barrel workshop, deep-hole drilling machines, CNC machines that are qualified enough to process revolver parts, and a great team that oversees all these affairs. Other than that we have a pressing workshop for producing metal magazines and a specialized team for the job. We have business partnerships for production and sales in the Defence Industry. When we evaluate these qualities altogether, it is apparent that we are a company which always presents impressive, different, quality jobs. We became one of the few companies that produce 20-round drum magazines just like we became the company that produced the best working and designed 1919 style 12 gauge 20-round drum magazine. After that, we managed to produce the first 1919-style 30-round drum magazine and we are working on a saiga drum project that can take 3" shells. All the products we have and produce in our catalog have unique features and qualities. Our fundamental focuses are endurance, design and innovation.

As a team, we are after projects and project partnerships for the World's most solid, different, and popular products. We surely moving forward in the direction of being the company that sets standards and leads the way.

# DEFENCE

# 20 RD DRUM MAGAZINE

DEFENCEPORT is one of the few 20 round drum magazine manufacturers in the world. The fundamental feature that separates DEFENCEPORT DRM-12 20RD Drum Magazine from others is easy-to-load ability. Maybe we should have named it easy load magazine. It is even way more easier to load than 5 or 10 round magazines.

A principle we take seriously is durability. DEFENCEPORT DRM-12 20 Round Drum Magazine transparent cover, body and included other parts passed drop tests. It's possible to drop your magazine while loading it, that's why we conducted our tests in shooting range. We dropped it both loaded and unloaded onto hard surfaces. The results were out of the charts including for transparent cover. Specially selected raw materials with special alloys provided us this.

Metal part of DEFENCEPORT DRM-12 20 Round Drum Magazine is specially hardened to handle the weight of the drum when loaded.

Performance is again one of our main principles. We emptied our drum under 5 seconds for many times and this drum never failed to cycle.

Our drum will take shells that is up to 3". It was manufactured in order to be compatible with all 1919 style shotguns. **The DEFENCEPORT DRM-12 Drum Magazine you are going to buy will work with %95 of the shotgun in the industry.**

All parts are changeable and optimal for service considering spare parts, even the metal magazine part. We can put 2+1, 5+1, 10+1 limiters according to importation laws of the target country. Designs and some working parts are patented.

# 30 RD DRUM MAGAZINE

30 RD DRUM MAGAZINE 

DEFENCEPORT DRM-12 30 Round Drum Magazine is the only product ever manufactured for 1919 style. It is a product that will make a shooter special. Your shotgun and you will feel stronger with DEFENCEPORT DRM-12 30 Round Drum Magazine. Easy loading feature is unique just like our 20 round drum magazine. You will be loading it way easier than you thought.

A principle we take seriously is durability. We upgraded its durability to endure more stress because of the fact that it is way heavier than the 20 round drum magazine. DEFENCEPORT DRM-12 30 Round Drum Magazine transparent cover, body and included other parts passed drop tests. It's possible to drop your magazine while loading it, that's why we conducted our tests in shooting range. We dropped it both loaded and unloaded onto hard surfaces. The results were out of the charts including for transparent cover. Specially selected raw materials with special alloys provided us this.

Metal part of DEFENCEPORT DRM-12 30 Round Drum Magazine is specially hardened to handle the weight of the drum when loaded. We used way more stronger alloy comparing with our 20 round drum magazine.

Performance is again one of our main principles. We emptied our drum under 5 seconds for many times and this drum never failed to cycle.

Our drum will take shells that is up to 3". It was manufactured in order to be compatible with all 1919 style shotguns. The DEFENCEPORT DRM-12 Drum Magazine you are going to buy will work with %95 of the shotgun in the industry.

All parts are changeable and optimal for service considering spare parts, even the metal magazine part. We can put 2+1, 5+1, 10+1 limiters according to importation laws of the target country. Designs and some working parts are patented.
